ABSTRACT

A resin composition containing an epoxy resin and a photo-radically curable resin, characterized by containing a triphenylmethane-based leuco pigment represented by formula (1):

$$H_{2n+1}C_n$$
 $H_{2n+1}C_n$
 C_nH_{2n+1}
 C_nH_{2n+1}
 C_nH_{2n+1}
 C_nH_{2n+1}
 C_nH_{2n+1}

n=2-4

The resin composition makes it possible to visually confirm the cured state thereof during working with ease in a short time period.
